It is now important that from an IRSE NEWS perspective, the editorial team understand and predict what the membership will want from us in the next five years, if not longer!

One idea is the intention to run more articles about what differing members around the world do in their day jobs, within the signalling and telecommunications industry. Whilst we have tried this idea before, we feel that it is important that the many and varied roles should be highlighted and shared with the membership, to identify their individual importance to differing projects or infrastructure owners.

So what else do you want to see and read about? Whilst we already have many articles about cutting edge technology and various technical solutions from around the world, there must be further items and issues that you wish us to cover?

The editorial team are always interested and keen to hear and learn from the world-wide membership about further possible developments of this successful publication. This being the case, please send your comments and thoughts to irsenews@irse.org.

Please remember that language is no barrier to our team. We can usually translate most languages. There is just one thing though. When you send an article for potential publication, please DO NOT embed your pictures within it. Please send all your pictures as individual JPEG files separately from your article, which should be in a Word file.

The editorial team look forward to receiving your feedback and comments sooner rather than later. Thank you for your support.
