The editorial team is always interested and keen to hear and learn from the world-wide membership about further possible developments of this successful publication. However, we seem to have problems recently regarding the quality of the pictures and diagrams supplied with potential articles for publication. This has resulted in a lot of rework by the editorial team. Good quality pictures and diagrams add to the overall quality of each article. Please feel free to contact one of the team when planning your next article. In most cases, we can help you to produce diagrams or source photographs that make the most of your article.

Please remember also that language is no barrier to our team. We can usually translate most languages. There is just one thing though. When you send an article for potential publication, please DO NOT embed your pictures within it. Please send all your photographs as individual JPEG files, these will be at least 2MB in size if they are to be of the quality we need for IRSE NEWS. Please send us your diagrams either in their native format (Powerpoint, Visio, Illustrator or similar) or as a high resolution PDF file. Your article should be sent in as a Word document.

Our stocks of articles are beginning to run down once again and we appeal to the membership and worldwide industry to support this publication in the near future. As always, the editorial team look forward to receiving your feedback and comments, as well as your articles. Thank you for your continued support.
